

GAME OPERATIONS, FROM ROSTER TO FINAL REPORT

Pricing & Packages

A seasonal subscription model for clubs, associations, and leagues that need reliable administration, game-day scoring, public results, and official reporting.

PRICING PRINCIPLE

Price by organization scale, active teams, and scheduled games. Include the people who make the platform work: administrators, coaches, operators, and unlimited public viewers.

Pilot

\$750 / season

Up to 4 teams · 50 games

- Complete core workflow for one evaluation season
- Admin Portal, Game Manager, and public Game View
- Game summaries and email delivery
- Guided initial setup and email support

Club

RECOMMENDED

\$2,400 / season

Up to 15 teams · 250 games

- Full roster, schedule, and game-day operations
- Multiple administrators and team managers
- Offline event sync and tablet recovery
- Standard scoreboard integration support

Association

\$4,800 / season

Up to 40 teams · 750 games

- Multi-level and multi-division administration
- Assisted roster and schedule imports
- Advanced operational reports
- Priority game-day support and admin training

League

From \$9,500 / year

Multiple organizations · Custom limits

- Central league administration and reporting
- Custom imports, integrations, and retention
- Dedicated onboarding and named support contact
- Contracted support and availability terms

CURRENT NETFRONT MODULES

Pilot eligibility: available to a new organization for one season. A season may cover up to 12 months. Historical teams and completed games do not count toward active limits.

ADAPT NETFRONT TO YOUR OPERATION

Add-ons and services

Capacity & software

Additional active team	\$150 / season
Additional 100 games	\$300 / season
Scoreboard Connect	\$600 / venue
Premium game-day support	\$1,500 / season
Custom branding/domain	\$750 + \$500/yr

Hardware & professional services

Scoreboard gateway hardware	\$495–\$795
Standard data migration	\$750
Complex data migration	From \$2,500
Custom scoreboard model	From \$2,500
Additional remote training	\$250 / session
On-site services	\$1,000 / day + travel

Hardware, installation, travel, replacement units, venue cabling, taxes, and third-party services are quoted separately unless explicitly included in an order.

Future product modules **NOT CURRENTLY FOR SALE**

The following price positions are planning targets only. These modules should be added to proposals after product approval, implementation, and production-readiness review.

StatManager

Proposed detailed game-stat capture with team-scoped operators and concurrent writer assignments.

Planning target: \$1,500 per organization/season or \$75–\$125 per team/season.

Tournament Manager

Proposed tournament scheduling and bracket operations as an event-based product.

Planning target: \$500–\$1,500 per tournament, based on teams and duration.

Pricing safeguards

- Keep scoreboard hardware separate from recurring software pricing.
- Scope custom integrations before committing to a fixed fee.
- Use fair-use controls for email and PDF volume without exposing per-event metering.
- Review third-party licensing and delivery costs as customer volume grows.

SIMPLE TERMS THAT ENCOURAGE ADOPTION

Recommended commercial structure

NetFront works best when the whole operation participates. Avoid per-user charges that discourage directors, coaches, operators, and volunteers from using the system.

- 1 **Seasonal subscription.** Bill Pilot, Club, and Association annually, aligned to the customer's operating season and covering no more than 12 months.
- 2 **Unlimited viewers.** Public Game View access remains unlimited. Include reasonable administrator, coach, manager, and game-operator accounts.
- 3 **Usage boundaries.** Count active teams and scheduled games. Do not count archived teams or completed historical seasons against current capacity.
- 4 **Commitment incentive.** Offer up to 10% off a two-year agreement. Reserve multi-organization volume pricing for Association and League contracts.
- 5 **No permanent free tier.** Use the one-season Pilot to lower adoption risk while covering onboarding and game-day support costs.
- 6 **Clear proposal scope.** Document included teams, games, venues, integrations, support hours, migration work, and hardware on every order.

RECOMMENDED LAUNCH OFFER

Lead with Club

\$2,400 / organization / season

Club is the strongest default package: enough capacity for an established program, the complete game-day workflow, and a price that reflects operational value rather than positioning NetFront as a basic scoring app.

Acquisition path: offer qualified new organizations one Pilot season at \$750, then move them to Club or Association based on active scale.

Pricing status: recommended launch framework for customer discovery and commercial validation. Final quotes should reflect deployment scope, service requirements, taxes, and contract terms.
